

# Technology for a sustainable future – Onshore/Offshore

Presentation

# The Company

## Who are we ?

- **Ocean Aquafarms** was established in 2015, transferring experience from large and complex oil and gas projects to aquaculture.
- **Ocean Aquafarms** is part of a group of companies that have been in operation in Norway for over 20 years concentrating mainly on projects with China.
- Over \$4 bn of business has been done between Norway and China. In all our projects, we aim to cooperate with strong Norwegian and Chinese partners which has given us success.
- Check our website [www.oceanaquafarms.com](http://www.oceanaquafarms.com) .

## What do we do?

- **Ocean Aquafarms** develops new technology.
- We have two main products, hydroloop and **HEX BOX**
- Both technologies are new solutions for large industrial scale fish farming. One is land based and one is offshore.
- These technologies are unique to us and are designed to produce large quantities of high-quality fish which is both sustainable and in an environmentally efficient way.
- Atlantic salmon is the fish we will start with.

## From rigs to fish

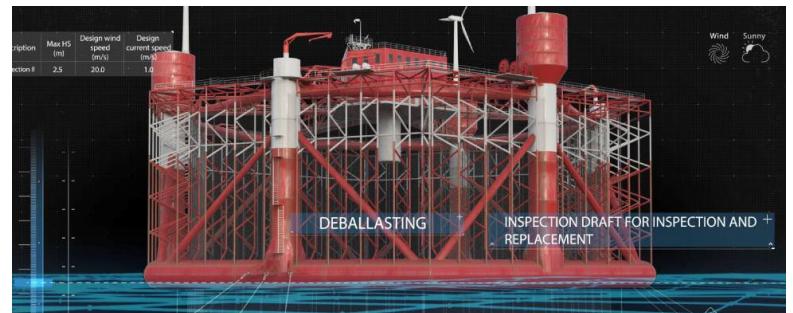

Expertise and knowledge from Norway - Products to be built in China

Norwegian Technology and Experience

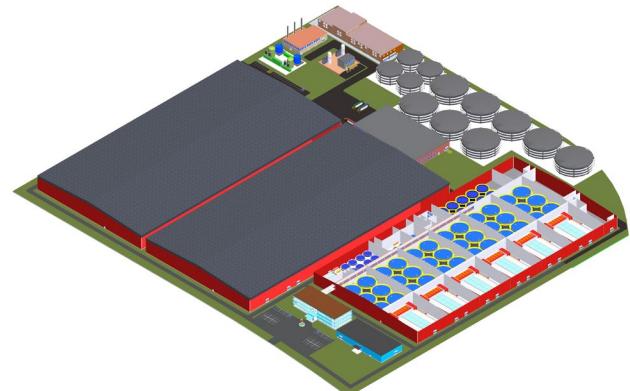

Manage large construction projects

Large offshore fish cages

Large onshore fish production (RAS)

# Fish Cages designed for China – Possible for Saudi

## // Main Dimensions

Length: 30m

Width: 31.5m

Depth: 26m

Draft: 18.5m

Volume: 63T

## // Main Dimensions

Length: 40m

Draft: 10m

Volume: 27,000m<sup>3</sup>

Accommodation Area: 500m<sup>2</sup>

## // Main Dimensions

Length: 66m

Width: 66m

Draft: 30m

Volume: 64,000m<sup>3</sup>

# Lower Cost seabed Cage suitable for Saudi[<30m water depth]

## “Big Whale 1#” Intelligent and Bottom Supported Offshore Cage

Possible to up-scale  
to 40m water depth

“Big whale 1#” is the chinese first intellegent aquaculture net cage which is applied in deep water with bottom supported, this is the first model production fabricated and designed by CIMC BLUE. The main functions are fishery breeding and recreational fishing. The major diameter is 66m x 66m, height of up ring is 34m, Max. operation water level is 30.5m, volume is 60000m<sup>3</sup>.

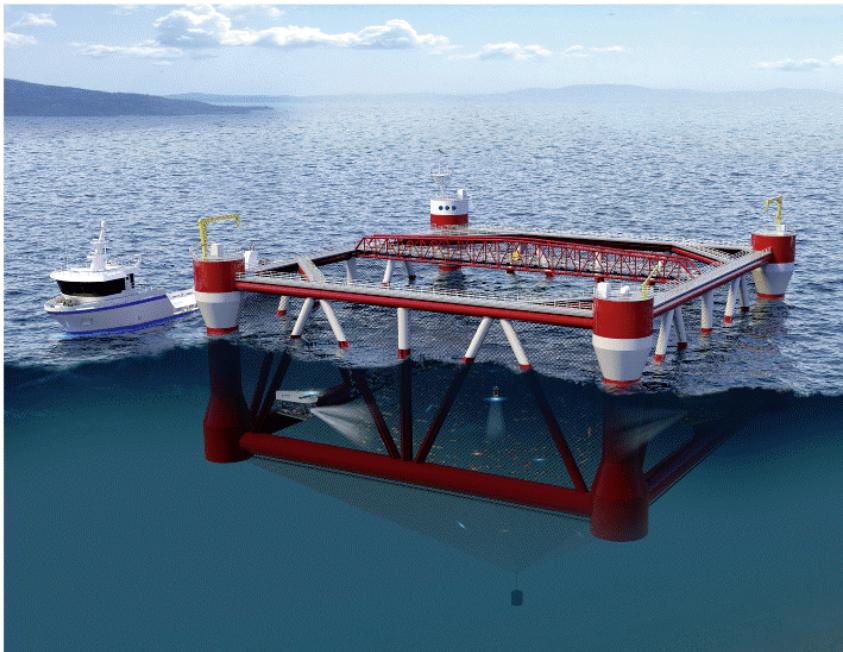

High molecular polyethylene net, automatic bait casting, underwater monitoring system, net cleaning system, automatic fishing system is quipped in this project. Automatic design will effectively improve the intelligent level and reducing the labor input. This is also can ensure the safety and economic behavior of the cages to the greatest extent. The structure is designed by villa style and will meet with fishing and tourism.

## “Big Whale 1#” Intelligent and Bottom Supported Offshore Cage

Main Diameter			
Length	:	66m x 66m	
Outside diameter between two columns	:	59.4m	
Upper ring	:	34m	
Mat size	:	10m	
Max. operation water level	:	30.5m	
Air gap for structure	:	7m	
Volume	:	~60000m <sup>3</sup>	
Design Condition			
Condition parameter	Storm condition	Operation condition	Remark
Environment Temp.	-10°C~35°C		
Design water depth(m)	26.5~30.5		
Wind speed(m/s)	36.0	17.1	Wind speed per minute
Max. wave height(m)	8.4	5.8	
Wave period(s)	12.5	10.3	
Design flow velocity(m/s)	1.2/0.8	1.2/0.8	Surface/bottom
Photovoltaic Power Generation System			
Polycrystalline silicon photovoltaic panels(270W)	:	135P	
Off-grid inverter all-in-one(SOKVA)	:	90P	
Battery(200Ah×12V)	:		
Generator			
Generator(380V/50Hz,150kW)	:	1set	
UPS Power			
UPS power	:	1set	
Water Generator			
Water generator (2T/day)	:	1set	
Sanitary Treatment System			
Sanitary treatment system (10person/day)	:	1set	
Safety Equipment			
Water fire protection system	:	1set	
Dry powder fire extinguisher (kg)	:	7pcs	
CO <sub>2</sub> fire extinguisher	:	3pcs	
Life jackets	:	30pcs	
Life raft (30 persons)	:	2pcs	
Life buoy	:	8pcs	
Distress smoke signal	:	1pcs	
General Guide Device			
Radar	:	1set	
AIS	:	1set	
VHF with DSC	:	1set	
Portable VHF	:	1set	
Radar transponder	:	1set	
Manual whistle	:	1set	
Feeding Facility			
Net cleaning machine (App. 400m <sup>2</sup> per hour)	:	1set	
Automatic feeding machine	:	1set	
Deck crane(3T)	:	1set	
Deck crane(5T)	:	2set	
Under Water Monitoring System			
Water quality sensor			
- Dissolved oxygen	:	1pcs	
- Salinograph	:	1pcs	
- Temperature	:	1pcs	
- PH value	:	1pcs	
Hydrological sensor			
- Water depth	:	1pcs	
- Flow velocity	:	1pcs	
- Flow direction	:	1pcs	
Underwater photography	:	1set	
Remote automatic lifting winch	:	1set	
Remote control monitoring system	:	1set	
Net System			
Net:4cm Dyneema (High molecular polyethylene)+coating			
Tensioning winches (8 x 10KN)	:	4set	
Rising Winches(8 x 10KN)	:	2set	
Positioning Way			
Sea water ballasted bottom support + solid ballast			
Tank Volume			
Fresh water(90L)	:	1pcs	
Spare fresh water tank(5m <sup>3</sup> )	:	1pcs	
Fuel oil (750L)	:	1pcs	
The Advantage Of Bottom Supported Cage			
New design structure, wave and tide resistant, enough huge fishing volume, high qualified production, easy to catch, more profit			

# Lower Cost Floating Cage suitable for Saudi[>50m water depth]

## HAINAN LINGSHUI DEEP WATER INTELLIGENT AQUACULTURE CAGE

HaiNan LingShui deep water intelligent quadrilateral aquaculture cage consists of four columns, upper ring, lower ring and bracings. It is positioned by mooring which is capable of withstanding level 17 typhoon. The dimension of the cage is 70m\*70m which supply a 125,000 cubic aquaculture space. The cage can be operated with a water depth of more than 50 meters.

The cage is equipped with automatic feeding, net washing and underwater monitoring system, by which the cage is made more intelligent and manning level was reduced. All these technologies maximized the safety and economic of the cage system.

## HAINAN LINGSHUI DEEP WATER INTELLIGENT AQUACULTURE CAGE

Principal Dimensions		
Cage Dimension	:	70m*70m
Column Height	:	34m
Aquaculture Volume	:	125,000m³
Design Condition		
S/N	Name	Sea Condition
1	Operation Mode	Normal Operation Condition 100 Year Extreme
2	Operation Depth(m)	>50 >50 Tide is considered
3	Tide Range(m)	1.98 2.42
4	Wind speed(m/s)	34.9 63.1 Average in 1 min
5	Significant Wave Height(m)	3.97 11.25
6	Maximum Wave Height(m)	5.8 16.43
7	Wave Spectrum Peak Period(s)	9.77 14.29
8	Wave Spectral (Zero-Crossing Periods)	7.44 11.41
9	Flow Speed(m/s)	0.82/0.74/0.48 2.37/2.17/1.16 Top/Middle/Bottom
Diesel Generators		
Disel Generator	:	1
Emergency Generator	:	1
UPS		
UPS	:	1
Safety Equipment		
Water Fire Extinguishing System	:	1
Dry Powder Fire Extinguisher (6kg)	:	7
CO <sub>2</sub> Fire Extinguisher	:	3
Survival Suit	:	12
Life Rafts (GPOB)	:	2
Life buoy	:	8
Smoke Distress Signal	:	1
Ballast System		
Ballast Pump	:	2
HPU	:	1
Remote Controlled Valves System	:	1
Storage Capacity		
Fresh Water Tank	:	1
Back-up Fresh Water Tank	:	1
Fuel Oil Tank	:	1
Telecommunication		
Radar	:	1
AIS	:	1
VHF with DSC	:	1
Potable VHF	:	2
Radar Transponder	:	1
Manual Whistle	:	1
Aquaculture System		
Net Washing Equipment (Appr. 400m³/h)	:	1
Automatic Feeding Equipment	:	2
Handling Crane (3T)	:	1
Handling Crane (5T)	:	2
ROV	:	1
Enviroment Monitoring System		
Meteorological Sensors:		
-Temperature	:	1
-Humidity	:	1
-Atmospheric Pressure	:	1
-Precipitation	:	1
-Wind Speed	:	1
-Wind Direction	:	1
Water Quality Sensor:		
-Dissolved Oxygen	:	1
-Salinity	:	1
-Temperature	:	1
-PH	:	1
Hydrological Sensors:		
-Water Depth	:	1
-Flow Speed	:	1
-Flow Direction	:	1
Cloud Underwater Camera	:	1
Remote Controlled Winch	:	1
Remote Controlled Monitoring	:	1
Net System		
Inner Net: Mesh Size 6.5cm,UHMWPE+coating protection		
Outer Net: Mesh Size 20cm,UHMWPE+coating protection		
Key Advantages		
Innovated structure,Strong resistance to wind and waves,Sufficient aquaculture production volume,High quality fish product,Quick and convenient fish-catching,High ROI and highly compatible to different market.		

## Alternative net solutions for Saudi

### One Proposed prototype

One of our proposals could be a fixed Jack Up platform and independent nets. Each platform can support up to 24 nets.

# Aquafarm Platform for Saudi

**25m × 25m Self-elevating  
Multifunctional Aquafarm Platform**

**25m × 25m Self-elevating  
Multifunctional Aquafarm Platform**

#### Main Hull Parameters

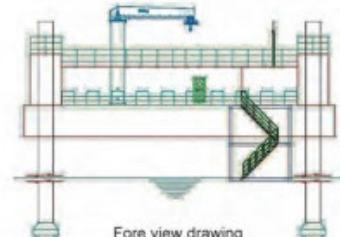

Length overall	:	25m
Breadth overall	:	25m
Depth overall	:	2.5m
Design water height	:	5~20m
Fixed configure person	:	2~4person
Leg number	:	4pole
Leg style	:	Cylindrical
Lifting style	:	Hydraulic latch style

#### Equipment Configure

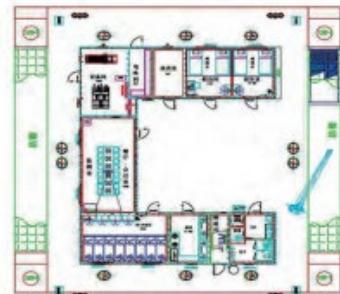

Solar panels	:	80 sq.m
Rectifier	:	30KVA
Inverter	:	30KVA
Storage battery	:	~800Ah
Emergency generator(380V 50Hz)	:	~100kW
Deck crane	:	1pcs

#### The Other Configure

Satellite television system	:	1set
Radar	:	1set
Monitored control system	:	1set
Life buoy	:	8pcs
Fire extinguisher	:	6pcs
Domestic water supply system	:	1set

Main hull arrangement drawing

# HEX BOX

**Hex Box** offshore fish farm is designed for harsh environments and has a size the area of a football field but built to handle the rough environment of the open sea.

This new sustainable technology is based on experience from large and complex oil and gas projects.

**Hex Box** has been designed to be very flexible.

It is a scalable solution that is tailored to be the best fit covering cost/size/water depth/fish type/location.

**Hex Box** for Norway is a top of the range solution, utilizing the best Norwegian technology and experience, as well as incorporating cost-effective marine fabrication expertise. This solution is applicable to salmon farming worldwide.

**Hex Box** global solutions include smaller and simpler solution but still uses the latest Norwegian technology which makes it suitable for variable water depths (either floating or fixed to the seabed) and is suitable for alternative fish types.

It is designed to be either stand alone or in a cluster with a jack up platform or mother ship to provide utilities.

This solution can be used world wide especially in less harsh weather locations.

## Hex Box Standard Design (Hs 10m)
